1 Quick start: 5 steps

New to the app? These five steps are all you need on day one.

1 Install

Install the ZagoraGPS app from the link your provider sent you, and open it.

2 Sign in

Enter the **server**, **username** and **password** you received, then tap **Sign in**.

3 Allow notifications

When the phone asks, tap **Allow**, so you get alerts such as ignition on, towing or SOS.

4 Find your vehicle

Open the **Map** tab. Tap your vehicle to see its speed, address and status.

5 Look back at a trip

Tap your vehicle → **History**. See where it drove and parked today, and replay the trip on the map.

What the colours mean

Colour	Status	Meaning
Green	Moving	The vehicle is driving right now.
Orange	Stopped	The tracker is online and the vehicle is standing still.
Grey	Offline	No recent signal from the tracker, for example in a garage without mobile coverage, or with the battery disconnected.
Light grey	No data	The tracker has not sent anything yet.

Next to the status you see for how long, for example *Stopped 2 h 15 min*.

Tip: share this page

This page is a complete quick start on its own. You can send it to drivers or family members who use the same account.
